Congratulations and welcome incoming COP students! The Student Health Center must receive clear and legible health and immunization documents **30 days after the date of your acceptance letter**. This one page checklist summarizes the health requirements of the College of Pharmacy (COP) for your convenience. More information and helpful tips can be found at the student health website for Entering Students at [http://studentservices.tu.edu/studenthealth/forms.html](http://studentservices.tu.edu/studenthealth/forms.html). The following documents are required and cannot be waived, (childhood vaccinations are strongly recommended):

1. **Health Forms required 30 days after your acceptance letter:**
   - Form A - Student Information
   - Form B - Health History - Completed by you and signed off by your primary care provider (PCP)
   - Form C - Physical Examination – Completed and signed by your PCP
   - Form D –TB Screen, Symptom Survey and 2 Step PPD – See TB Clearance documentation
   - Form F - Authorization for Release of Communicable Disease Clearance Information to Clinical Rotation

2. **Positive Lab titers: Required** 30 days after the date of your acceptance letter. Copies of the following lab titers must be on lab letterhead from the lab performing the test and have been collected within the last 5 years. For any negative or equivocal titers, send your results and documentation that you have restarted the vaccination series.
   - Positive Hepatitis B Surface Antibody Titer
   - Positive Measles Lab Antibody Titer
   - Positive Mumps Lab Antibody Titer
   - Positive Rubella Lab Antibody Titer
   - Positive Varicella Lab Antibody Titer

3. **TB Clearance documentation**
   - Form D-Initial TB Screen, Symptom Survey & 2 step PPD signed by your PCP and completed between June 1st and June 25. The 2 Step PPD consist of separate PPD’s placements and readings in the following procedure:
     - **Step 1:** PPD1 is placed on day one and read within 48-72 hours and documented in **mm of induration**.
     - **Step 2:** PPD 2 is placed 7-18 days after Step 1 PPD is placed and read within 48-72 hours in **mm of induration**. Both PPDs must be completed within 21 days.
     - If you have had the BCG vaccination without a subsequent positive PPD, you are to obtain a two-step PPD. If either PPD is positive, a current chest x-ray is required. A QuantiFERON Gold test may be required.
     - If you had a positive PPD in the past, submit a current chest x-ray report obtained within the last 6 months to a year. Provide documentation of your past positive PPD reading in mm of induration and any treatment recommended by your PCP for latent TB infection (LTBI). If a past positive PPD document is not available, you may need a 2 step PPD test and or a current QuantiFERON TB Gold test. Call the Student Health Center and ask for the Nurse Practitioner for further guidance.

4. **Immunizations:**
   - Required - Adult TDap Vaccination (tetanus, diphtheria & pertussis) obtained within the last 5 years
   - Required - Flu Vaccination within the last year
   - Recommended: Childhood Hepatitis B 3 dose Vaccination Series & any Repeated Vaccinations Series
   - Recommended: Childhood MMR (2 vaccinations) and any additional MMR Boosters.
   - Recommended: Childhood Varicella Vaccination or documentation of disease date

Please call or email Student Health Services with any questions. For more information about the College of Pharmacy health requirements, go to the Student Health website for Entering Students: [http://studentservices.tu.edu/studenthealth/forms.html](http://studentservices.tu.edu/studenthealth/forms.html). Please drop off clear legible copies of your documents to:

**Touro University California, Student Health Center**
1310 Club Drive, Wilderman Hall Room 114, Vallejo, CA 94592  Ph: 707-638-5220
